## FOOD SAFETY POLICY

MICROTROL Sterilisation Services Private Limited, Mumbai, recognises and acknowledges its responsibility for Food Safety. MICROTROL will strive to assess the risks to the health and safety of its employees and to anyone else who may be affected by the Ethylene oxide (EO) processing activity and to reduce risks to a tolerable level. This includes safe and hygienic handling of all food products which are sent by the customers for EO processing treatment.

The services provided by the company, MICROTROL Sterilisation Services Private Limited, for bioburden reduction treatment for various commodities shall comply with the respective international specifications as stipulated by the customer. The company shall operate under a quality system conforming to FSSC 22000, GMP and other applicable quality system regulations. The company shall comply with all regulatory and statutory requirements as well as address all internal and external communications. The company shall also address needs to ensure competencies related to food safety.

This policy sets down the framework for all food handling meant for commercial purposes on MICROTROL's premises.

This policy does not apply to food brought into the company premises by individuals for their own consumption and food purchased for the consumption in designated area by the employees or visitors.
